Key Competencies:

- **Data Analysis & Business Intelligence:** Expert in analyzing enterprise data and building SQL- and Tableau-based dashboards, KPIs, and exception reports to support decision-making and operational remediation.
- **Data Governance, Quality & Security:** Experienced in master data validation, metadata management, sensitive data classification, and fine-grained access control across Hadoop EDL and other enterprise data platforms.
- **Delivery & Stakeholder Collaboration:** Skilled at translating business requirements into scalable data solutions, coordinating UAT, and partnering with analysts and leadership to improve data accuracy, compliance, and downstream system reliability.

Work Experience:

Wells Fargo & Co.

Lead Data Mgmt Analyst: Data Security & Governance

Jun 2020- Nov 2024

Advanced enterprise data governance by automating sensitive data detection and transforming static classification tools into a dynamic metadata registry. Managed end-to-end fine-grained data access, including requirements gathering, policy configuration, testing, and change approvals.

- Led project team for the development of an end-to-end data scanning & classification application that captured business definitions, data value patterns, and classification categories, while enabling version control, approval workflows, and integration with automated data scanning tools; improving accuracy, governance, and reducing risk in sensitive data handling.
- Directed efforts to link data scan results to classified data elements, establishing performance monitoring and continuous optimization processes that reduced false positives by **40%** and improved the effectiveness of automated data discovery and classification.

Data Mgmt Consultant (Contract/Temp Assignment)

Led implementation of enterprise data governance and security policies for the Enterprise Data Lake, translating business requirements into application access controls and driving testing and deployment of role-based and fine-grained security.

- Collaborated with a team of four analysts to design and implement a robust security gating strategy for data onboarding to the EDL.
- Developed comprehensive processes for scanning, tagging, and classifying metadata, which reduced potential data security breaches by **26%**.

Tech: Python, Privacera, Apache Ranger, Dataguise (PKWare), Aquadata Studio, Alteryx, PowerBI, Hadoop, Apache Spark, Microsoft Office, Microsoft SQL Server, Google Cloud Platform (GCP)

Coca Cola Consolidated

Finance Analyst: Finance Shared Services & BI

Nov 2015- Apr 2020

Led data transformation and migration initiatives by designing and enhancing ETL processes, while also developing Business Intelligence reports and dashboards to provide actionable insights from incoming customer pricing data.

- Led the development of self service pricing audit and billing research tool for addressing contract pricing discrepancies. Reduced month over month revenue loss due to invoice disputes by **31%**.

Business Intelligence Developer: Enterprise Master Data

Full-time SQL and BI Developer supporting Data Quality within the Enterprise Master Data organization. Partnered with master data analysts and business leadership to identify data quality issues in SAP MDM and translate business rules for Customer, Material, and Vendor domains into SQL logic that supported validation, testing, and governed remediation.

- Identified 60+ business rules and potential points of failure within the Master Data domain. Converted these rules into complex SQL queries to identify and recommend corrections for invalid master data. Built self-service (Tableau) dashboards with drill-down KPIs to monitor master data health and support analyst-led remediation.

Tech: SAP ECC, SAP HANA, SAP MDG, Tableau Desktop, Python (Anaconda), Jupyter Notebook, Microsoft Office, SAP BODS, Business Objects, Webi, Winshuttle

Freelance (Self Employed)

Sep 2015 - Feb 2020

Business Intelligence Consultant

Partnered with small to mid-sized businesses to establish and maintain data analytics repositories. Collaborated with Product and System Owners, Development, QA, and Subject Matter Experts to ensure alignment on data requirements. Facilitated stakeholder requirements sessions and optimized BI reporting tools, including Tableau and Power BI, through upgrades and troubleshooting support

- Executed major upgrades and optimizations on Tableau and Power BI dashboards, improving refresh speeds by **40%** and saving over 20 labor hours per month.
- Provided essential break/fix support for BI tools, resolving **100+** unique issues, reducing downtime by **30%**, and ensuring uninterrupted business operations for clients.

Tech: SAP ECC, Tableau Desktop, Python (Anaconda), Jupyter Notebook, Microsoft, Business Objects, Office, Microsoft SQL Server, Microsoft Power BI, Alteryx, NetSuite, AWS (hosting PostgreSQL environments),

Husqvarna Group

Feb 2010 - Sep 2015

Call Center Operations Analyst

Analyzed KPIs and trends to identify process improvements, optimized agent performance, enhanced customer experience, and supported contact center system enhancements while delivering actionable insights to leadership.

- Designed multidimensional reporting cubes (SSAS) and SSRS dashboards that automated call center "Balanced Scorecard" reporting, reducing manual reporting time from **3+** days to overnight and providing real-time KPI visibility across multiple systems (Telephony, Quality Management, Workforce Management, CRM, & HR).
- Led the company's first formal Shift Bid process using the IEX Workforce Management system, introducing a data-driven scheduling method that aligned staffing needs with call forecasts and rewarded top performers based on Balanced Scorecard rankings. Reduced mismatches between forecasted call demand and staffed shifts by **25%**.

Tech: JDE ERP, SAP ECC (FICO), IBM Sterling B2B Integrator, Microsoft SQL Server, Microsoft EDW, SSAS (Multidimensional Model), SSRS Microsoft Excel, Microsoft Access, Cisco UCCE, NICE Perform (QM)

Kennametal Inc.

Mar 2007 - Feb 2010

Sales Support Specialist

Provided sales support by managing CRM data, preparing quotes and proposals, coordinating customer communications, generating sales reports and performance dashboards, and assisting with process improvements to drive revenue growth and enhance client satisfaction. Received requests from sales team via voice, chat, email and fax.

LearningStation, Inc.

May 2005 - Feb 2007

Sr. Technical Support Specialist

Managed onboarding for K-12 clients on a SaaS education platform, including data ingestion, account provisioning, and SSO vendor coordination. Delivered Tier 2 support across phone, email, and chat, resolving daily use platform issues and ensuring successful school deployments.

Electronic Data Systems

Mar 2001 - May 2005

Customer Care Representative - Business

Served business customers with large multi-line AT&T Long Distance accounts, resolving complex billing inquiries, provisioning account changes, and ensuring accurate contract pricing through re-rate credits

Education: East Gaston High School- High School Diploma -1996
